Section 4. First Aid Measures

General Information: Immediately remove any clothing soiled by the product. In the event of persistent symptoms receive medical treatment. Symptoms of poisoning may even occur after several hours; therefore medical observation for at least 48 hours after the accident.

After Inhalation: Immediately move exposed person to fresh air. If breathing difficulty persists or develops get prompt medical attention.

After Skin Contact: Immediately wash with water and soap and rinse thoroughly. If skin irritation continues, consult a doctor.

After Eye Contact: Rinse opened eye for several minutes under running water. Then consult a doctor.

After Swallowing: Seek medical treatment.

Most Important Symptoms/Effects, Acute and Delayed: No further relevant information available.

Indication of Immediate Medical Attention and Special Treatment Needed, If Necessary: No further relevant information available.

Section 5. Fire-Fighting Measures

Suitable Extinguishing Media: Use fire-fighting measures that suit the environment.

Special Hazards Arising From the Substance or Mixture: No further relevant information available.

Advice for Firefighters Protective Equipment: Because fire may produce thermal decomposition products, wear a self-contained breathing apparatus (SCBA) with a full face piece operated in pressure-demand or positive-pressure mode.

**EXPOSURE CONTROLS**

**Personal Protective Equipment** : Keep away from foodstuffs, beverages and feed.

**General Protective and Hygienic Measures**

- Immediately remove all soiled and contaminated clothing.
- Wash hands before breaks and at the end of work.
- Avoid contact with the eyes.
- Avoid contact with the eyes and skin.

**Breathing Equipment** : Use suitable respiratory protective device when high concentrations are present.

- In case of brief exposure or low pollution use respiratory filter device. In case of intensive or longer exposure use respiratory protective device that is independent of circulating air.

**Protection of Hands**

- The glove material has to be impermeable and resistant to the product/ the substance/ the preparation.

  **Material of gloves**: The selection of the suitable gloves does not only depend on the material, but also on further marks of quality and varies from manufacturer to manufacturer. As the product is a preparation of several substances, the resistance of the glove material can not be calculated in advance and has therefore to be checked prior to the application.

  **Penetration time of glove material**: The exact break through time has to be found out by the manufacturer of the protective gloves and has to be observed.

**Eye Protection** : Wear appropriate eye protection to prevent eye contact.
