Section 4. First Aid Measures

Inhalation	:	Move to an area free from the risk of further exposure. If not breathing, or breathing is difficult, obtain medical attention.
Skin Contact	:	Flush skin with plenty of water for at least 5 minutes while removing contaminated clothing and shoes. Wash thoroughly with soap and water. Get medical attention if irritation or rash develops on affected area. Wash clothing before reuse.
Eye Contact	:	Rinse with water immediately for 5 minutes. If irritation occurs, seek medical attention.
Ingestion	:	Do not induce vomiting. Never give anything by mouth to an unconscious person. Get immediate medical attention.
Most Important Symptoms/ Effects	:	See Section 11

Section 5. Fire-Fighting Measures

EXTINGUISHING MEDIA

Suitable	:	Carbon dioxide, dry chemical, or foam.
Inappropriate Media	:	Water spray or water discharge.
Special Hazards Arising from the Substance or Mixture	:	Toxic and/or irritating fumes can be produced during burning of this material. Decomposition products may be hazardous (see Section 10 for details on decomposition products).
Advice for Firefighters	:	Firefighters should wear self-contained breathing apparatus and full protective clothing. Downwind personnel should be evacuated. Do not reseal contaminated containers as pressure buildup may rupture them.

Section 6. Accidental Release Measures

- Personal Precautions, Protective Equipment and Emergency Procedures** : Evacuate personnel. Wear suitable PPE as described in Section 8.
- Environmental Precautions** : Prevent migration into groundwater, sewers, or streams. Land spills may require excavation of contaminated soil. Material should not be released into the environment.
- Methods for Containment and Cleaning Up** : Recover the spilled liquid with an inactive absorbent (e.g. dry sand) and put into chemical waste container. Prevent liquid from entering sewers, watercourses, etc.

Section 7. Handling and Storage

HANDLING PRECAUTIONS

- Precautions for Safe Handling** : Use in a well ventilated area, using good industrial hygiene practices. Avoid contact with eyes, skin, and clothing, and wear proper PPE (see Section 8).

STORAGE REQUIREMENTS

- Conditions for Safe Storage, Including Any Incompatibilities** : Store material at ambient temperature and pressure. Keep away from sources of direct heat and moisture. Keep container tightly closed when not in use. Containers can retain product residue after being emptied. Always obey hazards warnings and handle empty containers as though they were full.
- Material is stable under normal conditions.

Section 8. Exposure Controls/Personal Protection

- Engineering Controls** : Provide local exhaust ventilation to keep airborne concentrations below the recommended occupational exposure limits.
- Personal Protective Equipment** : **HMIS PP, C | Safety Glasses, Gloves, Apron**
4,4'-Methylene bis(2-chloroaniline) (MOCA) (101-14-4) [100%]
- Personal protective equipment**
- Respiratory protection:** Where risk assessment shows air-purifying respirators are appropriate use a full-face particle respirator type N100 (US) or type P3 (EN 143) respirator cartridges as a backup to engineering controls. If the respirator is the sole means of protection, use a full-face supplied air respirator. Use respirators and components tested and approved under appropriate government standards such as NIOSH (US) or CEN (EU).
- Hand protection:** Handle with gloves. Gloves must be inspected prior to use. Use proper glove removal technique (without touching gloves outer surface) to avoid skin contact with this product. Dispose of contaminated gloves after use in accordance with applicable laws and good laboratory practices. Wash and dry hands. Full contact Material: Nitrile rubber Minimum layer thickness: 0.11 mm Break through time: 480 min Material tested: Dermatrill (KCL 740 / Aldrich Z677272, Size M) Splash contact data source: KCL GmbH, D-36124 Eichenzell, phone +49 (0)6659 87300, e-mail sales@kcl.de, test method: EN374 If used in solution, or mixed with other substances, and under conditions which differ from EN 374, contact the supplier of the CE approved gloves. This recommendation is

Section 8. Exposure Controls/Personal Protection *cont'd.*

EN 374, contact the supplier of the CE approved gloves. This recommendation is advisory only and must be evaluated by an industrial hygienist and safety officer familiar with the specific situation of anticipated use by our customers. It should not be construed as offering an approval for any specific use scenario.

Eye protection: Safety glasses with side-shields conforming to EN166 Use equipment for eye protection tested and approved under appropriate government standards such as NIOSH (US) or EN 166(EU).

Skin and body protection: Complete suit protecting against chemicals. The type of protective equipment must be selected according to the concentration and amount of the dangerous substance at the specific workplace.

Hygiene measures: Handle in accordance with good industrial hygiene and safety practice. Wash hands before breaks and at the end of workday.
