

DSB 1521 Adhesive (Aron Alpha 202F)

Product Description

Product Description: DSB 1521 is a cyanoacrylate glue used to bond rubber to rubber. It is recommended only when removal and replacement with continuous seal is not possible.

Packaging

Available in a 4-pack of 0.7-ounce bottles.

Directions

Ensure surfaces to be bonded are clean, dry, and free of any debris. Apply to both surfaces, then mate them and keep pressure until the adhesive dries. Consult D.S. Brown Strip Seal Repair Guide for full instructions.

Storage

Store in tightly sealed containers in a cool, dry area away from direct sunlight or sources of heat. Shelf life of properly stored material is one year from date of manufacture.
